Executive Director

The board relies on Kansas resident licensees to perform investigation of complaints filed with the board. The investigators are independent contractors retained by the board on a case-by-case basis. The pool of investigators includes approved licensees from each of the five professions regulated by the board.

When a complaint is received, it is reviewed by the board's complaint committee. If deemed necessary, the complaint is sent to an investigator licensed in the profession to be investigated. The investigator reviews the complaint and advises the Board if they are willing to accept the case. If accepted for investigation, documents are obtained and reviewed, and individuals are contacted as the investigator feels appropriate to determine if a violation may have occurred. The investigator then prepares a written report with their findings and conclusions for the Board to consider. Investigators are compensated for their time and expenses in accordance with board policy.

Investigators perform an essential function for the board. If you are interested in serving as an investigator you are encouraged to send a letter of interest to the board.

Be A Surveyor

KSBTBP revised the education requirements in December 2020 to become a licensed surveyor in Kansas, creating a non-degree pathway for surveying licensure.

The traditional path to licensure included education requirements of a 4-year degree with 4 years of experience or a 2-year degree with 6 years of experience. The revised regulation added a non-degree education pathway to licensure coupled with 8 years of experience.

K.A.R. 66-9-5 does not require a degree but rather successful completion of at least 12 college hours of approved surveying coursework consisting of three semester hours in each of the following:

- 1) surveying measurements and analysis,
- 2) global positioning system (GPS) surveying techniques,
- 3) real property law, and
- 4) boundary control and legal principles.

Landscape Architects

The content and structure of L.A.R.E. will change beginning December 2023. Please see the [CLARB website](#) for more information on these exams.

NCEES Exams

The PE Structural exam will have its last pencil and paper administration in October 2023. All exams will be computer based after this date.

Continuing Education

During this renewal season, don't forget to review the continuing education requirements effective December 4, 2020.

You can check out our December 2020 newsletter or you can find the regulations on our [website](#). K.A.R. 66-14-1 through 66-14-12 provide information on definitions, computation of credits and activities.

Investigators Needed

KSBTBP is presently seeking licensed professionals in each of the technical professions of Engineering, Architecture, Land Surveying, Landscape Architecture and Geology to serve as investigators, on an as-needed basis, on behalf of the Board regarding both complaints concerning the unlicensed practice of the technical profession and/or the failure of a licensed professional to conform his or her practice to the requisite professional standards. If interested in serving as an investigator for the Board, please contact us ksbtbadmin@ks.gov and attach a current resume. State of Kansas employees are not eligible.

Congratulations to Professional Licensees by Exam since December 2022

Disciplinary Action Taken by the Board

KANSAS STATE BOARD OF TECHNICAL PROFESSIONS DISCIPLINARY REPORT JUNE 2023

IN THE MATTER OF STEPHEN MASLAN, PE9190 CASE NO. 23-16

Summary: In November of 2022 the Board office received an alleged violation form on Mr. Maslan. In the complaint it is alleged that Stephen Maslan exhibited unethical behavior for failing to obtain work permits for work completed under his sealed drawings.

Board Action: The board found Mr. Maslan in violation of K.S.A. 74-7026(a)(2). Specifically, Mr. Maslan engaged in misconduct when he failed to enter into a written contract regarding the work he completed for a deck addition. Furthermore, he failed to obtain the required permits for the work completed under his sealed drawings. The conduct of Mr. Maslan, as outlined above, constitutes violation of the laws of the State of Kansas.

Board Action: The Board ordered Mr. Maslan to obtain three extra continuing education hours.

Status: The case was closed February 2023.

Disclaimer: Every effort has been made to ensure that the following enforcement information is correct; however, this information should not be relied upon without verification from the Kansas board office. It should be noted that the names of companies and individuals listed may be similar to the names of parties who have not had enforcement actions taken against them. Disciplinary orders are public information and copies may be obtained by contacting the board office.
